

Co-funded by the Erasmus+ Programme of the European Union

We intend to create innovative materials for teacher education in the field of energy, using a narrative and imaginative approach to science teaching and learning

We intend to create a network of academic institutions and private/public stakeholders dealing practically with matters concerning energy

**JOIN e<sup>4</sup>  
NETWORK!**

Bring more real work significance and references to science teaching and students learning

Contribute to the development of a skilled future workforce by increasing interest of students in scientific careers

Fulfil the social dimension of your Corporate Social Responsibility

Influence positively the educational contents and methods of the coming generation regarding science and energy

**FIND OUT HOW TO GET INVOLVED!**

**tools in higher Education for an Embodied & creative Energy Education**
